Training description:

Throughout this course, you will progress systematically through guided training, exploring the details of the Segmentation module.

In this second part you'll gain a deep understanding of teeth movement and staging in aligner softwares. The course emphasizes the strategic placement of attachments and their vital role in the treatment process. You'll delve into the details of (IPR) techniques and learn how to seamlessly include additional objects in aligner treatment plans.

Through practical exercises and demonstrations, this course ensures you acquire the essential skills for proficient execution within the Onyxceph Aligner Module.
